August 21, 2015

ViCOROB

Content

- ▶ This template was adapted from Lilyana Vankova latex template called as Feather template.

source files

The theme contains 4 source files:

- ▶ `beamercolorthemevicorob2.sty`
- ▶ `beamerouterthemevicorob2.sty`
- ▶ `beamerinnerthemevicorob2.sty`
- ▶ `beamerthemevicorob2.sty`

For using the vicorob2 Theme you will need the Bemaer class installed and the following 2 packages

- ▶ TikZ[1]
- ▶ calc

Due to the fact that the packages are very common they should be included in your latex distribution in the first place.

---

[1]TikZ is a package for creating beautiful graphics. Have a look at these online examples or the pgf user manual .

Thank you for using Feather Beamer Theme!
